

# AI Readiness Assessment

**Artificial Intelligence (AI) has the potential to help you transform, solving some of your most complex challenges. When adopted correctly AI can help you automate the mundane and get ahead faster.**

Applied in combination with data, analytics and automation, AI can help organisations:

- Reduce costs
- Create new products, services or revenue streams
- Drive efficiencies in established processes
- Boost production and productivity
- Improve customer satisfaction

## Are you ready to take advantage of AI?

BJSS' AI Readiness assessment evaluates an organisation's readiness and effectiveness regarding the use of AI and provides tailored recommendations to fully leverage AI as a value driver.

- Assess readiness to roll out AI
- Evaluate current AI capabilities
- Identify gaps and areas for improvement
- Identify high-value use cases for AI
- Develop a prioritised roadmap of initiatives in line with business and AI strategy

## Benefits to your business

**BJSS' AI Readiness assessment enables organisations to develop:**

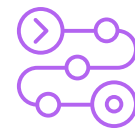

**Shared understanding** of the current AI use in the organisation, in particular a clear understanding of the challenges faced around AI, data science, and machine learning.

**Better coordination** of how AI is utilised across functions and departments, resulting in improved efficiency and effectiveness.

**Tailored outcomes** that have been developed in collaboration with you and your team(s).

**Immediate next steps** and a clear roadmap to improve your capabilities and realise value from AI.

## How we work to assess the AI Readiness of your organisation

1. A team of BJSS' multidisciplinary experts in Data, AI, MLOps, and Service and Organisational Design gathers information from your teams and reviews people, processes and technologies to evaluate your organisation's current level of AI Readiness via workshops, interviews, questionnaires, as well as documentation and code reviews.
2. We provide a current AI Readiness score as well as a proposed target score which is in line with your objectives.
3. BJSS provides a set of recommended next steps, totally bespoke to your organisation and industry, to develop your AI capabilities through people, process, and technologies.
4. BJSS works with you to develop those recommendations into a detailed implementation roadmap that guides your organisation towards successful AI implementation.

# BJSS' Six Focus Areas for AI Readiness

Through our experience successfully implementing AI, we have developed a set of six readiness areas to assess your organisation.

## Why partner with BJSS on your AI strategy?

- BJSS is practitioner-led and has successfully implemented data strategies across large, complex organisations spanning a variety of industries
- The Consulting, Design and Tech Delivery teams at BJSS collaborate to set strategies, engage users, and deliver world-leading data architecture, platforms, and solutions
- Partnerships with AWS/Microsoft/Google Cloud and platform vendors Databricks and Snowflake provide insight into the wider data ecosystem
- BJSS has built, run, and helped users adopt large-scale enterprise platforms (e.g. National Highways), and has years of market-leading practices to apply and advise upon data strategies
- BJSS provides workshops aligned to specific business challenges

In addition to data strategy and advisory, BJSS has a range of offerings:

- Advisory
- Strategy Design
- Ideation
- Maturity Assessment
- Service Design
- Operating Model Design
- Capability Build
- Tech Selection
- Data Governance & Management

Speak directly to the team by booking a 30-minute call to discuss the AI readiness of your organisation, allowing us vital insight into your business to assess how we can help you get the best out of AI.
